

OUR SERVICE

Our technical consulting services are focused on helping operators reduce risk, improve reliability, and gain confidence in the performance and compliance of their assets. We provide independent, data-driven insight to identify system vulnerabilities, uncover hidden losses, and resolve recurring issues—supporting safer operations, improved operational efficiency, and informed decision-making.

Areas of Technical Focus

-  Facility Reviews & Audits
-  LAUFG Reviews & Investigations
-  Overpressure Protection Compliance & Reliability Reviews
-  Root Cause Analysis
-  Big Data & Diagnostic Initiatives
-  Facility Drawing Reviews & Updates
